

## Trinidad Lake, Colorado

(Project operational in 1977)

The dam is located in Las Animas County, on the Purgatoire River approximately 4 miles upstream from the city of Trinidad, Colorado and 250 miles from Albuquerque.

The dam is an earthfill structure 6,610 feet long with a maximum height of 200 feet above streambed. The reservoir has two uncontrolled spillways.

The project controls flood waters from a 671 square mile drainage area.
